

## Power Distribution Unit

A power distribution unit (**PDU**) or is a device fitted with multiple outputs designed to distribute electric power, especially to racks of computers and networking equipment located within a data center.

### Specification-US type PDU

| ITEM                        | DETAILS DESCRIPTION                  |
|-----------------------------|--------------------------------------|
| Material                    | Aluminum alloy                       |
| Sockets                     | 6/8/10/12 Sockets                    |
| Color                       | Black                                |
| Install                     | Horizontal/Vertical                  |
| Cable                       | VDE 3G*1.5*1.5m                      |
| Current                     | 15A                                  |
| Voltage                     | 220-250V 50-60HZ                     |
| Max out put power           | 3500W                                |
| Control indicating function | ON-OFF Switch, with surge protection |
