

V50

Name: Robot Vacuum Cleaner

Color: Rose Gold

Size: 320*320*78mm

Power: 28W

Rated voltage: 14.8V

noise: 0-65dB

Battery Capacity: 2600mAh

Mopping Area: 90-200m²

Dust Box Capacity: 600ml

Tank Capacity: 350ml

Mopping Time: 90-120min

Functions:

- 1.Imported ST high-performance chips, gyroscope memory navigation, intelligent positioning and planning cleaning. The machine have multiple sets of high-precision sensors,and can fixed-point automatically recharge (when the battery power is less than 20% ,the machine will automatically recharge), automatic anti-drop, infrared anti-collision,and intelligent escape.
- 2.Imported digital frequency conversion brushless motor. The motor speed is up to 16000RPM, and the standard mode suction is 1800Pa, the stronger mode suction is up to 2000Pa, which can be adjusted freely by yourself.
- 3.Micro-sensing electric control water tank. The machine evenly seeps out water when working, and does not seep water when it stops working.
- 4.600ml large dust box (it is built-in HEPA three-layer filter system,which can make stronger filterability) and 350ml water tank,which can be freely interchangeable. It also can meet the large area of 200m²with cleaning mopping.The machine have Intelligent recognition system, and it can automatic switch the cleaning mode.
- 5.Smart APP remote control (It needs mobile phone and machine to connect to WIFI at the same time.). It can start the plan cleaning (automatic) mode remotely, schedule cleaning mode (timed), fixed cleaning mode, along wall mode, re-recharge mode, adjust water tank water output

and the suction size. You also can check the reservation cleaning record at any time.

6.It is additionally equipped with an infrared receiving remote control with a remote control distance of 8~10M. It is used one button to begin the planning cleaning mode, fixed point cleaning mode, along the wall mode, re-recharge mode, mopping mode, and you can adjust the suction size. You can also control the machine by yourself. Hold the direction button of the remote control,and the machine will walk as your mind.

7.When the machine is in the planned cleaning mode, the working route is "弓" shaped. In the spot cleaning mode, the machine is spirally cleaned for a while at the same location. In the along wall mode, the machine works along the wall.

8.Intelligent voice broadcast. When the machine starts working, charging or encountering an obstacle or the cleaner is completed, it automatically plays the sound. It is more convenient to use for the old people and children.

9.Longer anti-winding side brush and large area lock water mop. It can clean wider range,besides,the hair is not easy to entangle.

10.2600mAh high energy density lithium battery. It can be used for 90~120 minutes when fully charged.

11.IML brushed cover, green and environmentally friendly, more scratch-resistant and resistant to fading.

Gyroscope Navigation | 350ml Electronic-control Wet Mopping
Sweeping-Mopping Double Planning | New Upgrade Cleaning
 Strong Upsurge Suction | Memory Automatic Recharge
