

1. Cable Description

The fibers, single mode or multi mode, are positioned in a loose tube made of a high modulus material. The tubes are filled with a water-resistant filling compound. A steel wire, sometimes sheathed with PE for cable with high fiber count, locates in the center of core as a metallic strength member. The fibers (sometimes with plastic fillers) are stranded around the strength member into a compact and circular cable core. The core is longitudinally applied over the cable core, which is filled with the filling compound to protect it from moisture ingress. The cable is completed with a PE sheath.

2. Application

- Adopted to outdoor distribution;
- Suitable for aerial, pipeline laying method;
- Long distance and local area network communication.

3. Characteristics

- Good mechanical and temperature performance
- High strength loose tube that is hydrolysis resistant
- Special tube filling compound ensure a critical protection of fiber
- Crush resistance and flexibility
- PE sheath protects cable from ultraviolet radiation
- The following measures are taken to ensure the cable watertight:
 - Steel wire used as the central strength member
 - Loose tube filling compound and 100% cable core filling
 - PSP enhancing moisture-proof and anti rodent

4. Cable construction details

Number of fiber	48 core	
Moisture Barrier	Water blocking system	
Central strength member	Material	Steel wire
	size	1.4mm
Loose tube	material	PBT
	diameter	Φ2.0(outer/inner)
Tube-filling	Tube filling compound	
Armoring	Material	Corrugated steel ta

Outer sheath	material	PE
	Thickness	1.70±0.2mm

5. Fiber and tube color

Tube color	1	2	3	4		
	Blue	Orange	Green	Brown		
Fiber color	1	2	3	4	5	6
	Blue	Orange	Green	Brown	Grey	White
	7	8	9	10	11	12
	Red	Black	Yellow	Violet	Pink	Aqua

6.Cable Mechanical characteristic

core	Cable diameter	weight
48 cores	9.5±0.3mm	105±5kg/k
Min Bending Radius(mm)	Long term	10D
Min BendingRadius(mm)	Short term	20D
Min allowable Tensile Strength(N)	Long term	600
Min allowable Tensile Strength(N)	Short term	1500
Crush Load (N/100mm)	Long term	300
Crush Load (N/100mm)	short term	1000
Operationtemperature (°C)	-40+70	
Installationtemperature (°C)	-20+60	

7.Fiber characteristic

Fiber style	Unit	SM G652	SM G652D	MM 50/125	MM 62.5/125

8.Package

1.Packing material: Wooden drum

2.Packing length: standard length of cable shall be 2 km. Other cable length is also available if required by customer
