

**Single jacket dielectric fiber optic cable 48core dry core
CABLE FIB OPT SM CFOA-SM-DD-S 48F**

1. Cable Description

The Ultraviolet curable acrylic coated optical fiber. are positioned in a loose tube made of a high modulus plastic. The tubes are filled with water blocking yarn . The tube is wrapped with a layer of E-glass yarn . Between the eyarn a-glass yarn and the loose tube water-blocking material is applied to keep the cable compact and watertight. The cable is completed with a polyethylene (PE) sheath.

2.Application

The actual status of overhead power lines ,covers the general requirements of single jacket ADSS dielectric Cable for aerial or duct.

3. Characteristics

- FRP central strength member
- Tube with water blocking yarn
- Loose tube stranded
- PE sheath outdoor cable
- E-glass yarn make cable more tensile and anti rodent

4.Cable construction details

Number of fiber	48core		
Moisture Barrier	Water blocking system		
Loose tube and Filler elements	material	PBT	
	diameter	Φ2.1mm+ -0.15mm	
Central strength member	material	FRP
