K350 FIBER MASTER OTDR

function

Self calibration

1m Event dead zone

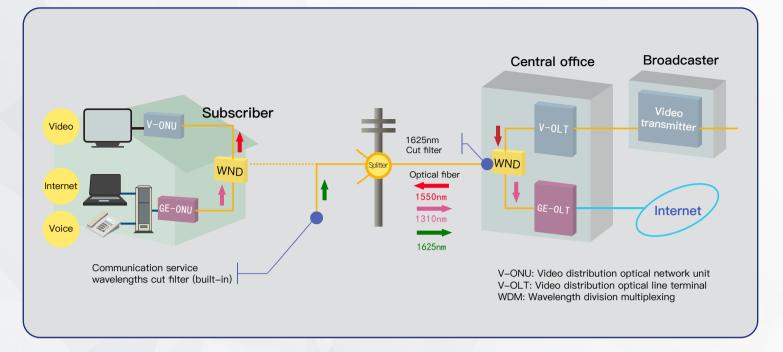

Dual wavelengths testing

140km Largest range

3-year Warranty

Application scenarios

KL350 OTDR is widely used in optical network terminals (ONT), FTTH distribution (F2) fiber characterized distribution hubs (FDH), fault diagnosis and fault finding.

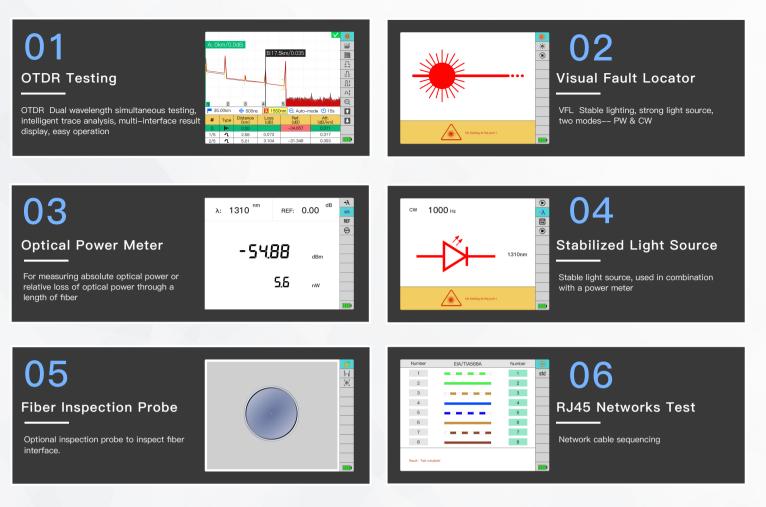

Product Features

- Long-haul network testing
- 32dB Dynamic range
- Access network testing

- All new UI design with innovation
- 1m Event dead zone
- Compact, rugged, light weight 0.7kg
 Link Map & Pass/Fail judgment functions
 - Dual wavelengths testing

Multi-function

✤ Dual Working Mode

Four test modes meet your measurement needs

Real-time test:

Monitors link measurement information, but does not analyze event information.

Average test:

Fixed time measurement, the results and event information will be analyzed after the measurement.

Expert Manual Mode

Select the expert manual mode to test

Intelligent automatic

It is convenient for beginners to quickly complete the test

Brand-new UI Design

Intelligent trace analysis

Intelligent trace analysis Dynamic display of test results

The test results are shown in a trace with distance on horizontal axis, lost power on vertical axis. When too many events, the horizontal and vertical axes can be enlarged to analyze.

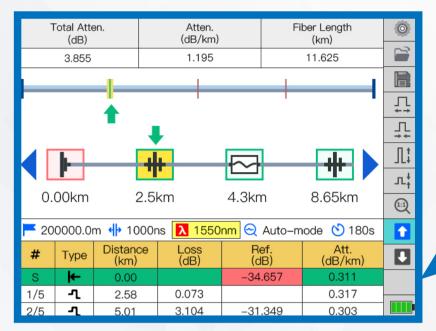

Events List

Optical cable breakpoint, loss, length, bending, connection, etc., in the trace, the loss or reflection obtained by the test is represented by events, and three event parameters can be viewed at the same time.

SKALQ Q35

Support the dual wavelengths testing 1310nm/1550nm

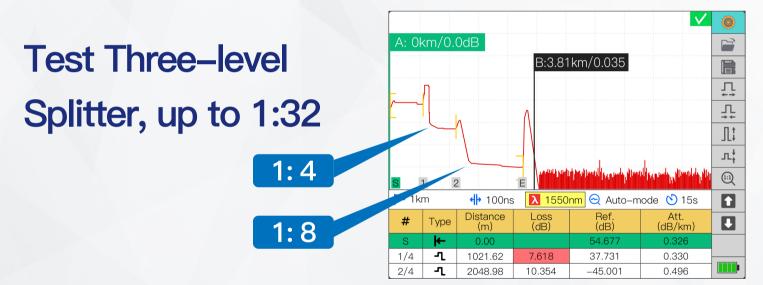

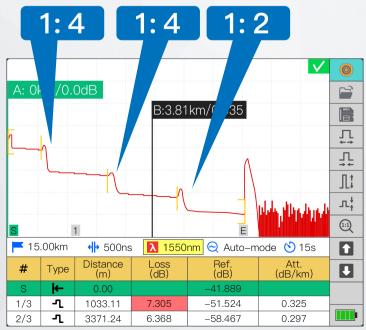

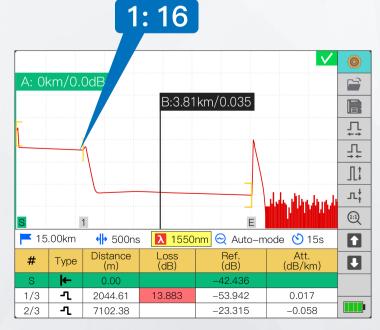

Link Map Function Icon Displays Events

A simple and intuitive graphical interface displays the length, event type, and breakpoint location of optical fiber links. One-click test operation enables instant isolation and evaluation of optical fiber failures.

Splitter Test

🚸 Self Calibration

Self Calibration Convenience to Maintenance

Circuit board Optical circuit Optical device

After the machine has been used for a long time, when its accuracy is not enough, it can perform self-calibration, reduce maintenance time and save costs

| Self Calibration | | 2021.07.20 |
|------------------|-----------------|------------------------------|
| 1 | Circuit | In progress, do not turn off |
| 2 | Optical circuit | |
| | | Confirm |
| 3 | Optical device | Cancel |
| | | |

♦ OTDR Trace Manager

Read and analyze on PC Mass Traces Operation

View the sor file in the OTDR trace manager, mass traces operation, add/delete events, bidirectional trace analysis, print preview, etc.

SC

ST (Optional)

LC (Optional)

FC (Optional)

Standard Package^①

- 1 Carry Bag
- ② OTDR main body
- ③ Inspection Certificate
- ④ Power adapter
- (5) Gallusus
- 6 Quick Reference Guide
- ⑦ Calibration Certificate
- 8 Brochure-JILONG/TAWAA

| Humidity | 0 to 90% RH (20 to 90% with 739874 AC adapter, non-condensing) | | | |
| Power requirements | 100 – 240V AC, 50/60Hz (AC adapter) | | | |
| Battery | 3000mAh | | | |
| LED Light illumination | ≥15000mcd | | | |
| Operating time*3 | 5 hours | | | |
| Data storage | Internal storage: ≥1000 waveforms, External storage: USB memory | | | |
| Dimensions | 118 mm (W) × 218 mm (H) × 55 mm (D) | | | |
| Weight | Approx. 0.73 kg (including internal battery and protectors, excluding OTDR unit and options) | | | |

Notes:

1. Minimum pulse width, return loss: ≥55 dB (≥40 dB for 850/1300 nm), group refractive index: 1.5, at 1.5 dB below the unsaturated peak level.

2. Minimum pulse width, group refractive index: 1.5, at a point where the backscatter level is within ±0.5dB of the normal level. For SMF, at 1310nm, return loss: ≥55dB.

3. New Battery

All specifications valid at 23°C \pm 2°C (73.4°F \pm 3.6°F) unless otherwise specified.
